Hindi English

PROJECTS

[SELECTED WORK →](#)

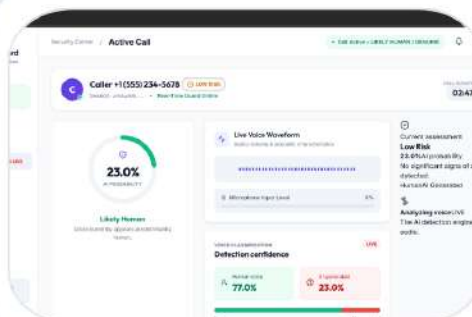

DhruvNetra

Offline-First Digital Twin & Remote Operations Platform

DhruvNetra is an offline-first digital twin and remote operations platform for Antarctic research stations, enabling real-time monitoring, 3D visualization, AI-based anomaly detection, predictive insights, and secure remote decision-making—even with limited connectivity.

React • Tailwind CSS • Three.js • JavaScript

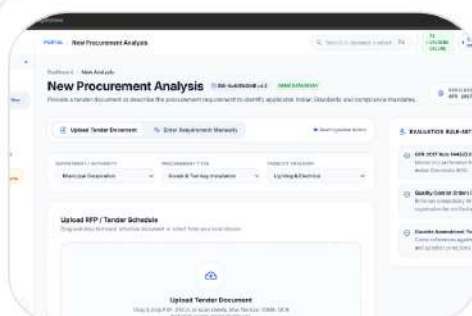

AI Voice Guard

Real time AI voice cloning detection

A web-based AI voice detection platform that analyzes uploaded audio to identify whether the speech is human-generated or AI-generated. The system processes voice characteristics and provides a clear detection result through a simple and user-friendly interface.

HTML • CSS • JavaScript • Python (Torch, SciPY, HuggingFace)

BharatManak

AI-Powered Recommendation Engine for Identifying Applicable Indian Standards for Procurement Specifications

An AI-powered recommendation platform that helps users identify relevant Indian Standards (IS) for procurement specifications. It analyzes product and procurement requirements, matches them with applicable standards, and provides structured recommendations to simplify standards selection and compliance.
